In this presentation, Charles Durrett will impart his decades of experience of cohousing and discuss how it got started, how it's designed, what its benefits are to the residents, and how it incorporates participatory design to promote more socially equitable and environmentally sustainable communities. He will also discuss how Danish cohousing has influenced cohousing in the U.S., how it has developed in the U.S., especially addressing issues like diversity and affordability, and what we have yet to learn from each other.
